

## SUCTION LINER SYSTEM

Highly flexible and transparent suction liner bag.  
 Super durability. Product would not damage even under toughest transport conditions or application.  
 Less transport cost. Approximately 50% less box dimension compared to traditional liners.  
 Less storage cost.  
 Economic.  
 Centralized and ergonomic removal handles.  
 Easy suction liner removal with one hand.  
 Lowest system set up time. 5 seconds vs. 18.5  
 Fastest reach to 80 kPa vacuum in the market.  
 Wide measuring scale for easy reading.  
 Canister scale accuracy +/- 100ml.  
 Built-in brackets of canisters provide easy mounting on walls, rail supports and trolleys.  
 Different suction tube options are available.  
 Latex free
